

SOUTH-EAST EUROPEAN FORUM POST EVENT REPORT 2012

Next Edition: 29-31 May 2013, IEC, Sofia, Bulgaria

The event is one of the prominent b2b eco initiatives in the Region of South-East Europe. It established itself as a platform for setting up new partnerships between governmental and local policy makers, investors, business executives, representatives of branch associations.

The positive feedback from speakers, exhibitors, visitors and attendees give a proof of the real success of the event held from 28 till 30 March 2012 in IEC, Sofia, Bulgaria.

The 8th Energy Efficiency & Renewable Energy Congress and Exhibition and the 1st SEE Solar Exhibition brought together leading experts to network and discuss the related hot issues and perspectives for the region of South-East Europe.

The 3rd edition of the Conference and Exhibition on Waste Management, Recycling and Environment 'Save the Planet' encouraged the know-how and technology transfer to the Regional market where advanced companies can find plenty of business opportunities.

TESTIMONIALS

'Our exhibitors from the Austrian Pavilion were all in all very satisfied with the show! EE & RES and 'Save the Planet' are - no doubt - the most important platforms for the fields of renewable energy and environment technology for the whole region, not only Bulgaria. Experts from whole Europe meet specialists from SEE and inform and discuss about solutions and latest technologies to save energy and our environment. A very successful mixture! So we are planning to enlarge the Austrian participation in 2013.'

Ivo Duerr, International Trade Show Agency, Vienna, Organizer of the Austrian Pavilion

'Thank you for doing such a great job with the event. Look forward to next year.' **David Sweet, World Association for Decentralized Energy (WADE), USA**

'I would like once again to express my warm congratulations for organizing such a great event, with an impressive participation.' **Ambassador Traian Chebeleu, Organization of the Black Sea Economic Cooperation (BSEC), Turkey**

'I found the expo very enlightening and am sharing this information with other organizations that I work with.' **Colleen Lehner, European Quality Association for Recycling, Germany**

'The conference and exhibition were very well organised. There were high quality presentations, excellent exhibitions and interesting discussions from a wide range of people from organisations around the world. Thank you for this very productive conference and exhibition.' **Dr. Chindarat Taylor, Resource Efficiency Pathway, UK**

'You provided the efficient and flexible services better than I have seen in any conference, all with heartfelt kindness and warmth that gave me overall a very good impression.' **Guillaume Perron-Piché, European Suppliers of Waste to Energy Technology (ESWET), Belgium**

'I met a lot colleagues and representatives from both private companies and public organizations. Thank you very much for your perfect organization! **Dr. Peter Hodecek, AVE Energie AG Oberösterreich Umwelt GmbH, Austria**

'The participation in the Congress enabled us to exchange experience on the problems of the various stakeholders involved in the chain of production and consumption of renewable energy.'

Denitsa Pandeva, Bulgarian Executive Forestry Agency

'We are glad that we achieved our objectives. It is very important for us to participate in such major initiatives related to the energy efficiency because we are convinced that ETEM has a key role in this sector in Bulgaria.' **Mr. Bulionis, ETEM Bulgaria**

'There was significant interest in the products of Hill & Smith from companies from Croatia, Italy, Romania, Czech Republic and Serbia, which contributed to the creation of useful contacts in these countries. Most of the companies, working in the renewable energy sector in Bulgaria, participated in the exhibiton. This enabled us to maintain the already established business relationships. **Julia Koleva, Hill & Smith, Bulgaria**
